Stochastic and distribution method before and after optimization evidence

I performed 5 tests when it was unoptimized and optimized then took the average of them all. These test results will be shown in the Figures below.

All tests were performed on the same hardware and conditions with **100 steps** and **1,000,000 repeats**

Unoptimized Stochastic Tests

Test 1	Test 2	Test 3	Test 4	Test 5	Mean time
56.40	58.38	55.45	59.01	57.73	57.394

Optimized Stochastic Tests

Test 1	Test 2	Test 3	Test 4	Test 5	Mean time
36.81	37.24	36.60	36.90	37.15	36.94

Time saved from optimization: 20.454 (35.63%)
